

Interfaces and connections – simple organisation of multilingual content

Order and manage your texts and translations digitally: we provide the perfect plug-ins and connectors for all standard content management systems (CMS) and editorial tools such as, for example, ns.publish, SCHEMA, Woodwing, Xpublisher, Cosima/Docufy, Noxum, TIM/Fischer Technologies, Enlite/Confluence or Censhare, product information management systems (PIM) and webshops (e-Commerce). Simplify and accelerate your workflow by connecting your CMS to our systems. In this way, you can benefit from our language services without the tedious copying and pasting of texts. With the right plug-in and add-on, you can integrate our language and technical experts directly into your system (CMS). Just one click gives you all the selected texts in the right format for the translation process. When translated, they can be transferred back to your own software – again with just one click. This ensures maximum connectivity and efficiency.

Company

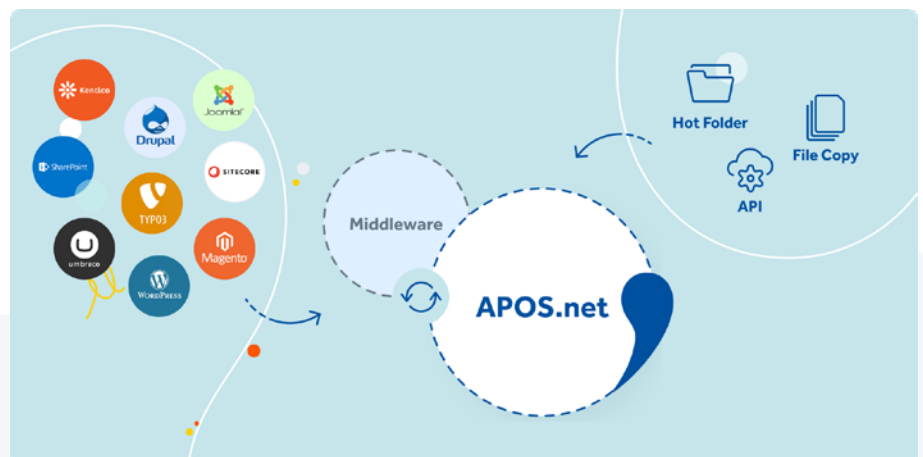

Founded in 1994
160 employees
100 languages
> 2,000 language professionals
> 5,000 clients

Advantages

- In-house linguists

Security

100% discretion and maximum security for your confidential data thanks to data hosted in Switzerland and ISO 27001 certified processes.

The Language Intelligence Company

How it works in a CMS:

1. Create texts/content
Directly in your own CMS system
Apostroph Group would be happy to provide you with content specialists and help out with any support you may need
2. Have a text translated into the desired target languages with just 1 click
3. And then enjoy the automatic transfer of the translated text (target text) directly into the right fields of your CMS
4. Website go live

Advantages:

- No copy errors
- No unnecessary clicks or manual work
- The system automatically protects the format
- Immediate placement as a translation
- Acceptance of target text with just 1 click

For 25 years now, the Apostroph Group software engineers have been developing solutions for the translation process. Is your tool not yet listed? Then please get in touch. We would be happy to support you and offer you tailor-made solutions.

Company

Apostroph Group is the leading language service provider in the DACH (Germany, Austria, Switzerland) region with a total of 10 sites across Switzerland and Germany. Today, more than 5,000 companies and institutions rely on Apostroph's expertise.
